#### Xüsusi biliklər

---

Dil bilikləri	Rus — C2 — Səlis İngilis — B2 — Orta inkişaf etmiş Türk — B2 — Orta inkişaf etmiş Azərbaycan — C2 — Səlis
Biliklərim	jetpack compose Kotlin ios swift Swift java

#### Əlavə informasiya

---

## Mobile Developer | Founder of ILNOD Studio, #NOD & Technanod

Experienced Android developer with 3+ years of practical experience. Founder of ILNOD Studio and creator of the #NOD and Technanod brands, specializing in building scalable, modern, and real-world mobile applications for business, tourism, and public services.

Successfully developed and published over 30 Android applications, including:

- Evera - Commercial application for a company selling home & garden products. Built with Kotlin, MVVM, Firebase (Auth, DB), Google Maps API, Lottie, and Glide. Registered D-U-N-S number, prepared all legal documents, and launched via organizational Play Console.
- P1ONEER Market - Kotlin (Android) + SwiftUI (iOS) cross-platform app with OTP registration, Retrofit, Firebase, and Google Billing.
- ZamZam - Capital & Nod Taxi - Regional service apps developed in Kotlin with MVVM architecture, Firebase Firestore, and

published under an official organization account (nod.az).

- Qusar Travel – Guide & Nature – Tourism app developed for government-oriented promotion of the Qusar region. Built using Jetpack Compose, Firestore, MVVM, Clean Architecture, and Hilt for DI.
- Kiraye.az & Vakansiya.az – Functional apps built with Firebase backend and modern Material3 UI.
- Technanod Projects – Internal tools and innovative prototypes under the Technanod label.
- RichMedia Series – A set of 18+ educational apps built using Room, Volley, RecyclerView, and Firebase to demonstrate core Android concepts.

### Key Technologies & Tools:

Kotlin, SwiftUI, Jetpack Compose, MVVM, Clean Architecture, Firebase (Auth, Firestore, Realtime DB), Hilt, Room, Retrofit, Google Maps API, Google Billing, XML, Material3, Lottie, Glide, Navigation, CI/CD basics, D-U-N-S registration, Play Console (Organization).
