Əlavə informasiya

'm Vusal Nuriyev. I'm a fresh data scientist. I love working in machine learning sphere. Unfortunately, I don't have any work experience, but I am good at learning things, which is more important, also I'm open-minded, an easy-going person, good in working with team, solve problems on time, and I get what I want. Additionally, I have programming skills, which is needed in data science.

In addition, I love working on IOS platform. I used to work by myself in this sphere (created many apps by watching free courses in youtube) and much more. I have Mac on my own and that's why I also have experience in Mac. Someday I will be a great IOS Developer.
