İGC

Back-end Developer

This project is a 6+ year project. The project is a local project of the logistics company. It provides services to companies and people, both individually and corporately. I joined the team in the last 2 years of this project, and in these two years I made developments on both the frontend and backend. On the backend side, I worked with APIs in Controls. I pulled data, sent data, worked with LINQ and made queries. We worked on the entire project with ASP .Net Core 6. On the Feontend sid

TechLife

Full-stack Developer

The Pusulam project, specific to Ocean Holding's education departments, is an 8-year project. This project is an application that can be used by teachers, students and parents in general. I worked on this project for a year. During this time we used the API on the backend, made LINQ queries on the controller, and worked with MsSQL as the database. The entire project is written in MVC, ASP .Net Core 5. The front-end side is written using VueJS, JQuery, HTML, CSS, SCSS. In general, the wor

Media Balans

Back-end developer

I took part in 2 projects at the media balance company. Generally, I worked as a Back-end Developer. The projects I work on are "neyeyek.az" and "bizimsufre.az" websites. We used MsSQL as a database. We used ASP .Net Core MVC 2.2 on the back-end. Additionally, I took part in small-scale projects.
