Əlavə informasiya

Over the past ten years (10) I have worked closely with BP in the gas and oil industry. They have been devoted to construction and the last 12 years put into construction/permit coordination. I have experience working at the Sangachal Terminal in a site Permit coordination role.

Responsibilities: Review the scope of work for construction projects and maintenance orders to identify any possible anomalies and modifications. Monitor HSE performance, Review, marked -up as built drawings of the completed construction systems ., and Encourage intra-discipline and communication, to facilitate effective project collaboration. Monitor the installation progress, construction with project HSE and quality management plans-all assigned actions completed before the due date. Where requested carry out peer audits and reviews of construction activities and procedures.
