Data visualization | C++ | ajax | Git | Data structures

I'm Hikmet Ezimzade, a Python Backend Developer with a passion for building innovative web solutions and automations. With a strong foundation in programming and a knack for problem-solving, I've developed a diverse portfolio of projects ranging from web automation to data-driven urban development solutions.

Key Skills & Expertise:

*Web Development: Proficient in Django, REST API, and HTML/CSS, with experience in both backend and frontend development, creating scalable and efficient systems.

*Data Management: Skilled in analyzing and managing data to derive insights and drive decision-making processes.

*Automation: Experienced in developing automation tools, such as ChatGPT-integrated WhatsApp bot, Steam market analysis bot and crypto exchange automations to streamline operations and enhance user experiences.

Professional Journey:

My journey in tech began at Azerbaijan Architecture and Construction University, where I'm currently pursuing a degree in Information Technology. I have 6 months of experience in freelance projects, where I've honed my skills in both frontend and backend development, leading to successful web solutions.

Projects Highlight:

*Sales Data Management Website: Developed a Django-based platform for companies to store and analyze their sales data.

*Quiz Generation Website from PDF: Engineered a solution that converts PDF content into interactive quizzes, enhancing the learning experience for students.

*Geographical Data Analysis for Urban Development: Led a project focused on scraping and analyzing geographical data to address urban development challenges.

Personal Attributes:

I'm a critical thinker with excellent communication skills, capable of working effectively in teams and managing time efficiently. I'm continuously seeking new challenges and opportunities to grow, both as a developer and as an individual.
