Əlavə informasiya

I am currently pursuing a Bachelor's degree in Computer and Information Systems Security/Information Assurance at Baku State University, with graduation expected in June 2026. Additionally, I have honed my expertise in network and system administration through specialized training at Code Academy. My academic journey is complemented by hands-on experience as a Network Engineer intern, where I apply knowledge of network deployment, administration, and cybersecurity. Earning certifications like CCNA: Introduction to Networks and Switching, Routing, and Wireless Essentials has further solidified my technical foundation.

As part of Azərbaycan Respublikasının Milli rabitə operatoru olan “Aztelekom” MMC, I contribute to delivering a wide range of telecommunications services to individual customers, corporate clients, communication operators, and other users. As the national telecommunications operator of Azerbaijan with an established reputation for excellence in connectivity solutions across diverse customer bases. Contact me to learn more about how we can meet your telecommunications needs!
